**MORPHEO**

A perfect combination of the latest esthetical and technological advances, the new **Morpheo** is designed in detail to provide a stylish and user friendly horsebox for the competitor.

A quick glance will reveal the refinements that have become typical of the Theault brand. Sporting curves now bring a new shape to the back of the Morpheo that reflect its much admired front characteristics. However it is not just aesthetic, the invisible hinges of the back door and the embedding of all 7 rear lights into the bodywork bring safety, security and style together in a form that also allows the addition of options such as the tie bar to be fitted less obtrusively but no less practically.

**Structure in aluminium & polyurethane material, technology from the aeronautical industry,** gives strong and light construction. Morpheo is the lightest horsebox on the market in its class.

**The interior design completely updated** for the horse compartment provides simplified and user friendly accommodation. The partition can be manoeuvred easily by one person, sliding rails allowing easy transformation from 2 stall to 1. Height adjustability allows the partition to be tailored for the comfort of the horse.

**Maximum safety for the horse** travelling rear facing. Protective padding throughout. Rubber lining for easy cleaning.

Morpheo is available in **5 and 3 seat** cab models with various options for tailoring it to your needs.

**Morpheo is today a graceful reference to numerous technological and aesthetical advances protected by 2 patents and 8 registered designs.**

**NEW ADJUSTABLE PARTITION**  
Sliding and height adjustable

A variety of storage options to suit your needs

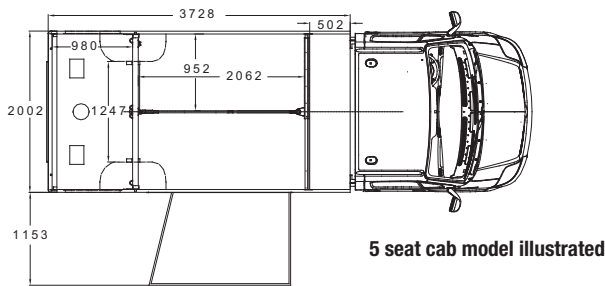

**Morpheo, more than 10 000 metamorphoses**
