New 2010

# PROteo

by THEAULT

## Proteo is practical

- Optimised locking systems for the doors and ramp. Easy to use with automatic closure.
- New version of our sliding partition with 7 positions makes adapting the horse space for comfort quick and easy.
- Enlarged ramp, spacious stalls with no central post. Proteo makes loading and unloading your horses safer and easier.

## Proteo and comfort

- Theault have followed the developments incorporated in the new Renault Master for improved soundproofing during transit and reduction of vibrations. A new level of comfort for passengers both human and equine.

## Proteo and economy

- By investing in a Theault horsebox you benefit from the reputation for quality that the brand has gained. An assured value with low depreciation.
- The most recent engines provide excellent fuel economy keeping costs low.
- Low cost maintenance.

## Proteo and design

- New, more spacious Luton provides greater storage space. The new rear panel with LED lights and horse tie bar (option) embedded for safety.

## Proteo and safety

- 5-seat cab homologated by UTAC insurable for up to 5 passengers.
- Rear door 1.2 metres wide available now in 3 formats. Easy access to your horses and equipment – An exit for your horses in case of emergency.
- Quick release breast bar assists easy exit of the horses in case of emergency.

## Proteo and the environment

Sensitive to the environment, Theault have produced the new Proteo to be as friendly to our planet as possible:

- Body construction of mainly recyclable materials.
- No toxic substances used in the construction of the body.
- The latest engines conforming to the new Euro 5 emissions standards.

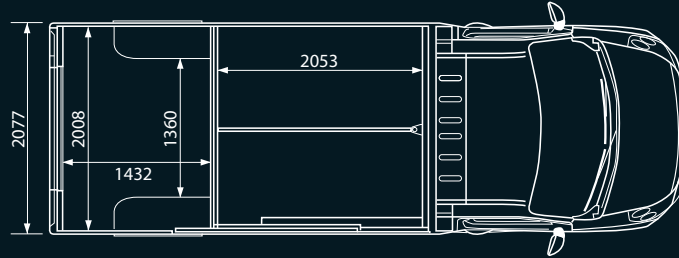

## Proteo and flexibility

- 3 different versions and an extensive catalogue of options permit you to customise your Proteo to suit your individual requirements.
- Proteo is available with 3 or 5 seat cab and also as a stud version with chute stalling.

Conceived and built in France at our factory  
in the bay of the Mont Saint Michel
